Early Hearing Detection and Intervention (EHDI) programs aim to proactively address infant hearing health and include:

- universal hearing screening of all newborns
- identification of babies with permanent hearing loss
- support services for technology & language development
- family support
- monitoring and evaluation of the program

Grades were assigned based on all five of the components being available province or territory-wide.

Canada’s Overall Grade: Insufficient

*Based on 2022/23 Statistics Canada live birth rates for Insufficient provinces and territories
